The NDPro Solution

For decision makers: connect, control and monitor AV and building systems through one central platform.

planspur netdesign gmbh

Rooms that simply work.

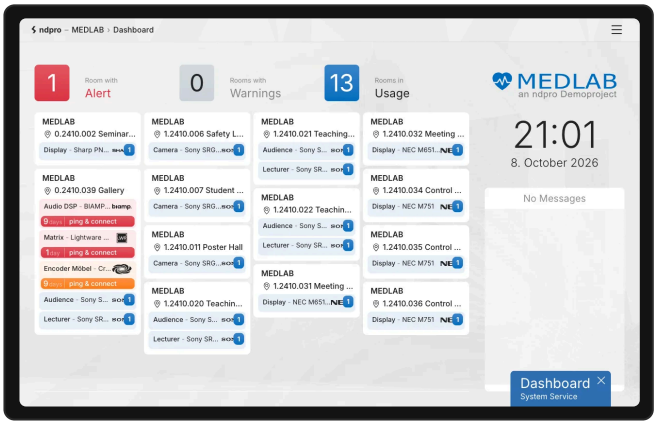

NDPro keeps your meeting rooms, media and building systems running reliably. We look after every device from day one until it is replaced.

- **Today:** Every vendor works differently, and faults show up mid-meeting.
- **With NDPro:** One way to operate every room. Every fault is reported at once.

Faults report themselves.

If a device fails, the dashboard shows it at once and service receives an e-mail, usually before anyone in the room notices anything at all.

- Live status of every device
- Warning by e-mail
- History for troubleshooting

Every floor on one plan.

Every floor as a floor plan, every room with its status: facility management keeps all buildings and sites in view and sees at once where something is wrong.

- Switch floors with one click
- Room status right in the plan
- One click into the room

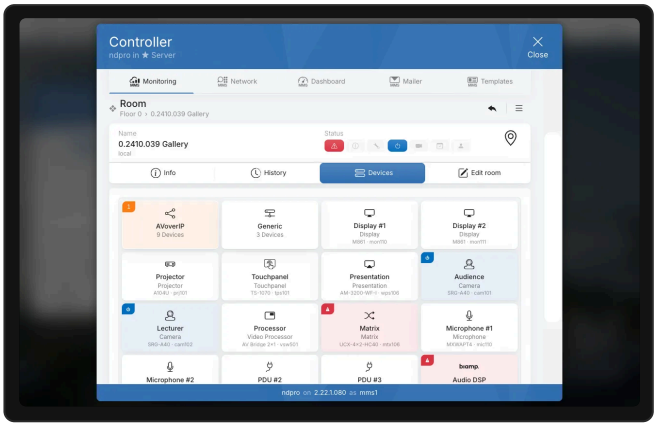

The NDPro Solution

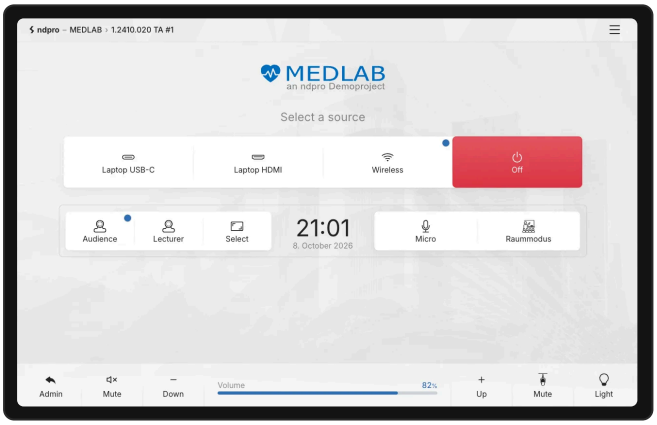

For decision makers: connect, control and monitor AV and building systems through one central platform.

Every device documented.

Devices, rooms and technical data in one place. New rooms are built from templates, and the documentation comes as PDF with your logo.

- Serial, firmware, IP and MAC
- Templates for new rooms
- PDF documentation in one click

One tap, the room is ready.

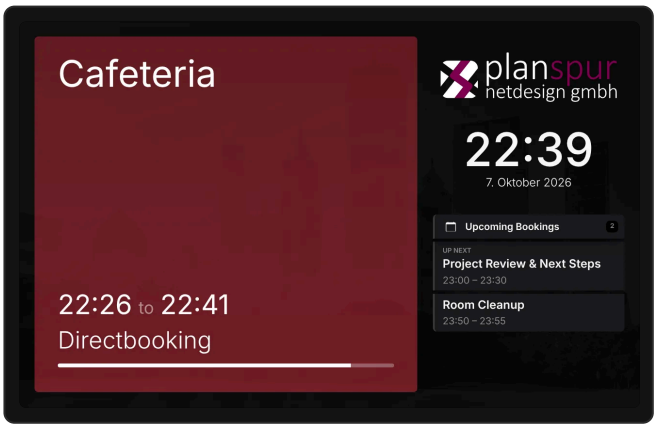

The touch panel starts the room the way it is set up for your team: picture, sound and conferencing, no remote controls, no call to the technicians.

- One way to operate every room
- Workflows instead of single devices
- Also in the browser on tablet or phone

Free or busy, at a glance.

The door sign shows the room status and the next meetings from Microsoft 365. Anyone who needs a free room books it right at the display.

- Free / busy right at the room
- Current and next meeting
- Book right at the display

The NDPro Solution

For decision makers: connect, control and monitor AV and building systems through one central platform.

planspur netdesign gmbh

NDPro at a glance.

What the system does, for planning, quotation and operation.

Operate

- Web portal on PC, tablet, phone
- Touch panels, e.g. Crestron
- Door signs with room booking

Monitor

- Live status of every device
- Warning by e-mail
- Floor plan with room status

Document

- Devices, rooms, locations
- Serial, firmware, IP address
- PDF export with customer logo

Integrate

- No extra software on devices
- REST, SNMP, KNX, BACnet etc.
- Microsoft 365 via API

Security

- Two-factor, single sign-on
- Rights per user and group
- Encrypted (HTTPS / WSS)

Operation

- In your own network, Linux VM
- Updates without project rework
- Several sites, one view

What you get.

Six reasons why teams work more calmly with NDPro.

Simple

One way to operate every room: in the browser, at the touch panel or on the phone. Nobody has to learn a new system for every single room.

Reliable

Every fault shows up at once and is reported to the service team by e-mail, so they are on site before a meeting really starts to suffer from it.

Clear

Every floor and every room on one plan, with the status always in view. Facility management sees at once where something is going wrong.

Vendor independent

Many vendors, one platform: all devices speak the same language, and you are free to choose the products that suit your building.

Documented

All devices and rooms in one place, the documentation as PDF in one click, with serial number, firmware and IP address of each single device.

Future-proof

Grows from the first room to the whole campus and runs securely in your own network. New rooms are set up very quickly from templates.
